

Domo Avantage

PE 15 mm fibrillated yarn, fully sand-filled, closed structure

Domo® Avantage is a sand-filled tennis product with the look and feel of a gravel court. This court is the perfect choice for prestige clubs and hotels wanting to offer their customers the best possible tennis facility whatever the season.

• Flat stable playing surface

• Can be played on at all times, all year round, even after rain > easy draining and quick-drying

• Game speed (cpr): medium

• Various colours available (green, red, white)

• Built-in markings

• Minimal maintenance

• Consistent even bounce thanks to the closed structure of the grass mat

• PE grass fibre has high UV stability and remains soft even in freezing temperatures

Additional advantages

• Permanent sliding-properties Domo® Avantage is covered with an extra layer of fine red sand which gives the court the typical sliding properties of a gravel court. The fine sand grains are round in shape, creating a perfect sliding surface. The round grain also ensures water drains away completely, preventing the top surface from hardening or compacting. The sliding properties are therefore permanently present.

• Gravel court look with built-in markings Domo® Avantage is a sand-filled tennis product with the look and feel of a gravel court. This tennis court is unique because it is produced with red fibres and filled with a layer of red sand on top. The fibrillated fibres of this grass mat form a closed, dense structure and hold the sand grains firmly in place. This prevents the bottom layer of white sand from mixing with the top layer of red sand.
